Tutorial:Software Understanding DNA And COM

Finally, System Services comprises those unexciting but essential services such as directory, security, management, networking and communications. Directory and security services can also be considered to be application services. Component Services is the heart of the Windows DNA infrastructure, provided by the component services, COM.

A Modern C++ Web Platform

Services API and its own new Internet server: Internet Information Services (IIS). The IIS strategy is that it's much faster to load a DLL to respond to an HTTP request than it is to start a whole new process. IIS and ISAPI. The IIS component is the heart of Microsoft's web platform. Most modern web sites.

C# Versus Java - Columbia University

whereas DNA is more of a "best practice" approach to development, at the heart of .NET is the Common Language Runtime (CLR), a set of operating-system services and an execution engine that provides run-time support for .NET programs. You can think of the Common Language Runtime as fulfilling the same role as the Java virtual machine.
